

Summary

Around 4.5+ years of experience in developing User Interfaces for Mobile/Tablet/Desktop using HTML, CSS, Type Script, JavaScript, jQuery, bootstrap. Extensive knowledge in developing applications in a single page (SPAs) using various JavaScript frameworks like Angular & node js

Skill Highlights

- Project management
- Strong decision maker
- Complex problem solver
- Creative design
- Innovative
- Service-focused

Competencies and Skills

Programming languages	:	Angular 6,7,8,10, NodeJS, Typescripts, Bootstrap HTML
Application Software	:	Microsoft Office.
Operating systems	:	Windows 7,8,10.
Areas Of Interest Development.	:	Web Programming, Software and Hardware
Soft skills	:	Good communication and Presentation skills
Software & Tools	:	Git , Docker.

Responsibility

- Professional, precise communication skills
- Working knowledge of front end optimization and performance techniques
- Good understanding of overall web design including basic usability, accessibility, industry standards, architecture, and navigation
- Makes design recommendations towards the development of new code or reuse of existing code
- Deep knowledge of AngularJS practices and commonly used modules based on extensive work experience
- Creating self-contained, reusable, and testable modules and components
- Ensuring a clear dependency chain, in regard to the app logic as well as the file system

- Thorough understanding of the responsibilities of the platform, database, API, caching layer, proxies, and other web services used in the system

Experience

CRM (Customer Relationship Management)

Role :- Full Stack Developer

Description: The aim is to generate an application CRM is for Admin module in which admin will access the sub module into it. Admin will decide which modules should be with menu in it. Into CRM admin will able to add, edit, delete or restore the data of the menu. Admin can add the details about country, site, employees, branch, Associate etc.

we have functionality of mapping like company with branch, Institute with branch means company belongs to which branch etc. In CRM User Group has the right through which other modules will able to show the menu into them.

Project 2: <http://travelamos.net> (Flight Booking Site)

Angular Developer

Description:

Flight Booking Web Application Along with Admin Panel (Front End: Angular6, Backend: node.js Express, Database: MYSQL, Type Scripts)

- 1)Login & Registration Api with JWT token Along with Middleware Function for Verifying the Valid JWT Token
- 2) Creating tours According to the Tour Packages in node.js
- 3) Implementation of Flight Booking Api in node.js
- 4) Implementation of Payment Gateway (Stripe Payment Gateway) in Node.js
- 5) All Crud Operations Api in node.js along with file uploading and image uploading in node.js using npm package called multer.

Project 3: <http://207.180.211.251/AutoSure/web> (Auto Sure Vehicle Insurance Company).

Designation: - Sr. Developer

Description:

Auto Sure- Vehicle Insurance Web Application (Front End: Angular8, Backend: node.js Express, Database: MYSQL)

Login & Registration Api with JWT token Along with Middleware Function for Verifying the Valid JWT Token this Project deals with Insurance of a vehicle, so all basic crud operation was used along with file uploading using multer packages

Project 4: <https://go-write.ie> (blog website).

Designation: - Jr. Software Developer

Description:

Go-Write-simple Blog website (Front End: Angular8, Backend: node.js Express, Database: MYSQL)

- Post Operation for Posting All the blogs in the website using node js Express framework
- Sending Emails Using Node Mailer Package to Respected Subscribers whenever a new blog is posted.
- Deployment of node js on server.

Deployment of Backend code of node.js on server using no hub npm package for running the server continuously.

Project 5: Created A Salon Application.

Designation: - Software Developer

Description:

Smart Mobile Catalogue in Salon Appointment App Customers love to browse through the catalogues when they are looking for salon booking options. It's easier for them to check the service directly from their mobiles by eliminating the requirement of a computer. ... Customers can: Book any service through the customer app.

Technology: - (Front End: Angular8, Backend: node.js Express, Database: MYSQL).
